

N,N-DIETHYLNIPECOTAMIDE

Product data

CAS No.: 3367-95-1
EC No.: 222-136-1
Molecular Formula: C₁₀H₂₀N₂O
Molecular Weight: 184.28
Name: N,N-diethylnipecotamide
Synonyms: (N,N-diethylcarbamoyl)piperidine
N,N-diethylpiperidine-3-carboxamide

Applications: For research use only
Intermediate of organic syntheses

PRODUCT DESCRIPTION

Form: clear colourless to yellow liquid
Boiling point: 111°C/0.81 kPa(lit)
Density at 25°C: 0.989 g.cm⁻³ (lit)

Specification	standard
Assay GC	95 %

SHIPPING, HANDLING AND STORAGE

- The material is packaged as requested by the customer
- N,N-diethylnipecotamide is regulated as irritant
- N,N-diethylnipecotamide must be stored in tightly closed container in a cool dry, well-ventilated area
