# N-ISOPROPYLHYDROXYLAMINE HYDROCHLORIDE

(50 % water solution)

## Product data

CAS No.: 50632-53-6  
EC No.: -  
Molecular Formula:  $\text{C}_3\text{H}_9\text{NO} \times \text{HCl}$   
Molecular Weight: 111.57  
IUPAC Name: N-(propan-2-yl) hydroxylamine hydrochloride  
Synonyms: Isopropylhydroxylamine hydrochloride  
N-Isopropylhydroxylamine hydrochloride

**APPLICATIONS:** Chemical intermediate for organic synthesis and reducing agent

## PRODUCT DESCRIPTION

Form: liquid  
Water solubility: soluble

Specification	standard
Dry matter	50 %

## SHIPPING, HANDLING AND STORAGE

- Isopropylhydroxylamine hydrochloride is packed as requested by the customer.
- Keep in a tightly closed container in a cool place away from incompatible substances
