

# DIDODECYLAMINE

## Product data

CAS No.: 3007-31-6  
EC No.: 221-114-9  
Molecular Formula: C<sub>24</sub>H<sub>51</sub>N  
Molecular Weight: 353.67  
IUPAC Name: 1-Dodecanamine, N-dodecyl-  
Synonyms: Di-n-dodecylamine  
Dilaurylamine

**Applications:** Intermediate for organic synthesis

## PRODUCT DESCRIPTION

Form: white crystalline solid  
Melting point: 45-50 °C  
Water solubility: insoluble

Specification	standard
Assay (GC)	min. 90 %

## SHIPPING, HANDLING AND STORAGE

- Didodecylamine is packed on request
- Didodecylamine should be stored in a tightly closed container to prevent access of CO<sub>2</sub> from air
